

ENHANCED SAFETY KIT FOR OFFSHORE CAPSULES

SURVIVAL SYSTEMS INTERNATIONAL

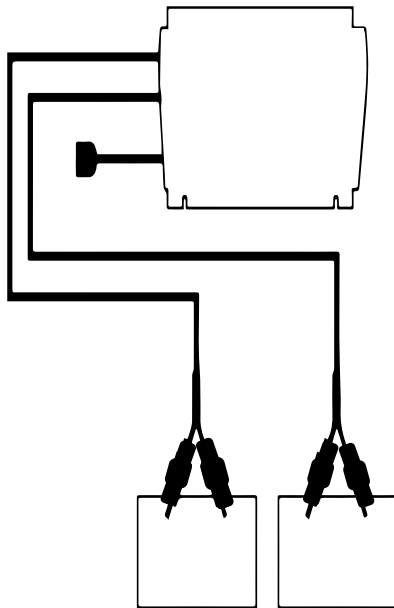

ADDED FEATURES - DESIGNED FOR YOUR CAPSULE - OEM CERTIFIED COMPONENTS - INSTALLED ONSITE - ADDED SAFETY

BATTERY TRICKLE CHARGER KIT

MODELS: Currently available for all SSI Capsules.

SAFETY BENEFITS:

This unit is a fully automatic multi-stage on-board marine battery charger. The unit is pre-wired and pre-installed inside the capsule and is 100% waterproof for fresh and salt water applications. The charging process delivers three sequenced modes of operation that include: Charging, Conditioning, and Maintenance of each battery. This process is proven to extend the life of your batteries and will fully charge your batteries each time. The included smart charging technology will automatically sense and distribute 100% of the available charging amps to any one battery or combination of all batteries. Each battery charger output is fully isolated.

WHAT ARE ESK's?

ESK's are SSI's engineered packages of additional components (or modified components) to "add-on" to your existing SSI offshore capsule, winch and/or platform. The goal of these kits is to offer additional functionality, ease of operation and ultimately added safety to your Survival Systems International equipment. Since SSI is the OEM of your equipment, as well as the designer and manufacturer of these Enhanced Safety Kits, the installation process is seamless and cost effective.
