SYSTEMS
INTERNATIONAL

ADDED FEATURES - DESIGNED FOR YOUR CAPSULE - OEM CERTIFIED COMPONENTS - INSTALLED ONSITE - ADDED SAFETY

ENGINE FIRE SUPPRESSION KIT

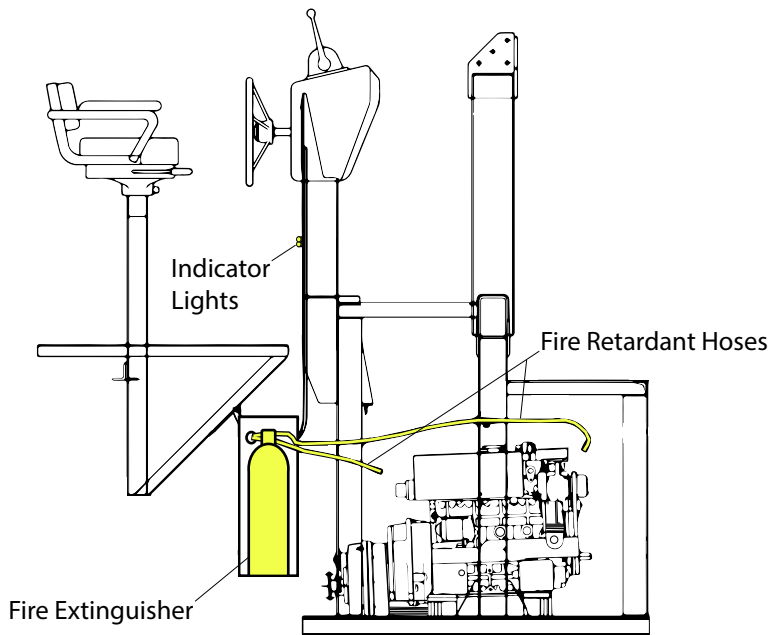

MODELS: Currently available for all SSI Capsules.

**SAFETY
BENEFITS:**

The Engine Fire Suppression Kit provide a means to deploy a foam based fire retardant to the engine and surrounding area in case of a fire emergency within the capsule. The pressurized foam tank is secured and protected within a fiberglass housing made of Vinyl Ester Fire Retardant fiberglass. Hoses, with fire retardant sleeves, route the extinguishing foam to the engine area to be dispersed through the system's mounted spray nozzles. This system can be installed into newly manufactured capsules, and is also available as an add-on kit for existing capsules

Components Include:

- Fire Extinguisher Foam Kit
- Extinguisher & Nozzle Brackets
- Information & Warning Decals
- Indicator Lights
- Fire Suppression Shroud Assembly
- Fire Retardant Hoses

**WHAT
ARE
ESK's?**

ESK's are SSI's engineered packages of additional components (or modified components) to "add-on" to your existing SSI offshore capsule, winch and/or platform. The goal of these kits is to offer additional functionality, ease of operation and ultimately added safety to your Survival Systems International equipment. Since SSI is the OEM of your equipment, as well as the designer and manufacturer of these Enhanced Safety Kits, the installation process is seamless and cost effective.
